Dear Committee members,

I've been privileged to be under the care of a Naturopathic physician since before Covid and am grateful for the breadth and depth of their knowledge. They helped diagnose and treat a low grade Lyme infection and monitored me through the months of treatment necessary to clear it. I've been able to regain so much health and vitality into my late 60's that I'm able to keep my own acupuncture practice alive.

Naturopathic doctors have the training and experience to offer a wide range of treatment options. This is key especially in treating diseases that we have little experience with such as the many tick borne illnesses and Covid. Please vote ought to pass and allow them use the full scope of their knowledge. Not only does this expand options for patients but it relieves the load on our shortage of primary care doctors.

Thank you in advance for your support of Naturopathic Doctors.

Abi Morrison
