This message originates from outside the Maine Legislature.

Good afternoon,

I'm reaching out to ask for your support regarding the naturopathic formulary.

I was helped tremendously by my naturopath. Dr Paton guided me through a rough time as I was experiencing grief that followed me after the death of my father. Grief is systemic and the gentle approach offered with naturopathic medicine was so helpful and life changing.

For many patients like me, natural medicine is a wonderful augmentation to allopathic medicine. It would be a huge addition to healthcare allowing naturopaths to expand their options for healing.

Lynn O'Neal
