This message originates from outside the Maine Legislature.

Please support these new rules. My daughter has chronic Lyme disease and Long Covid. Have you any idea how hard it is to find someone who is knowledgeable enough to treat these issues? Without our ND we would be in a very terrible situation.

I understand that there is strong opposition from the Maine Association of PAs and the Maine Medical Association for these new rules. This sounds like it comes from a place of worrying about losing business to a competitor and not looking out for the best health options for patients. Can we please put people first over the almighty dollar?

And while you're at it how about our NPs and the Maine Medical Association gets up to date on how to treat Lyme disease. It's discouraging when you listen to the local news do an update on Lyme from the experts and it's all WRONG.

Please feel free to call me if you want some first hand knowledge about what it's like to negotiate this special brand of hell.

Thank you,
Lynn Young
