Subject: Naturopathic medicine

This message originates from outside the Maine Legislature.

"Hi, my name Kimberly Browne and I am a patient of a naturopathic doctor in Hallowell, ME. My ND has helped me greatly in managing my autoimmune condition. More so than any of my other doctors. I also see her far more than any other provider. I am writing to you about the naturopathic formulary rules coming before the legislature. Naturopathic doctors have been licensed in Maine for 30 years and have had prescribing rights and the ability to provide IV therapy throughout that time. The Board of Complementary Healthcare has heard from stakeholders and approved these updated rules, and the Attorney General has also approved them. These rules will help NDs continue to provide essential healthcare, especially in rural communities. I am asking all representatives in Me to support adoption of these rules.

Thank you.

Kimberly Browne
