Subject: Support of provisionally adopted rule change for complimentary medicine.

This message originates from outside the Maine Legislature.

Dear Members of the HCIFS Committee,

I am writing in support of the proposed rule change for complimentary health practitioners. After contracting Lyme Disease over 20 years ago my recovery was made possible because of a Naturopathic Doctor. Since then I have seen other ND's and found the breadth of their offerings to be a helpful addition to traditional allopathic medicine. I believe expanding the scope of ND's abilities to treat patients such as myself would benefit the American healthcare system as a whole, by making treatments more accessible to patients who need access to comprehensive care more than ever.

Sincerely,

Evan Grant
