**Subject:** Support to the Maj Substantive rules provisionally adopted by the complementary health care providers

**This message originates from outside the Maine Legislature.**

Dear Ms Cayford,

I am writing in support of the provisionally adopted rules. The Naturopathic physicians I have gone to take the time necessary to clearly understand the issue(s) I describe and carefully consider the options for treatment. I am grateful, in particular, for the help I have received with respect to a possible problem with a tick borne disease.

I am confident that they have the knowledge required to prescribe both natural remedies and pharmaceutical medications and possible side effects and drug interactions because their training has included both.

Sincerely,  
Donna A. Busch
