Subject: Support for ND formulary rules

This message originates from outside the Maine Legislature.

Dear Legislators,

I would like to provide my support and insight for the ND formulary rules currently under consideration.

I have been under the care of an ND for more than 30 years: My daughter was in constant discomfort and continuous ear infections. It was the healing natural skills of the ND that gave her a happy healthy childhood. With these results myself and my son also went under the care of our ND. Without their care our lives would have been miserable.

I am now under the care of Dr Corina Dunlap and she is Amazing. It is her ability to prescribe that has made her care complete. She has the skills, knowledge, holistic approach and experience to provide answers to symptoms that were passed as normal and I am blessed and forever grateful!

Please take this knowledge and know your decision to approve the additional formulary rules will allow Dr Dunlap and all NDs the ability to help so many patients.

Kindly,

Cheryl
