

Lucy Birkett
Freeport

We have an important opportunity with LD 437 to to ensure resilient land and water resources for all Mainers.

I urge you to co-sponsor and support LD 437, which will create a program within the Department of Agriculture, Conservation and Forestry that prioritizes the continuous improvement of Maine's agricultural soils.

This is a voluntary program, and could provide education and incentives for Maine's farmers to utilize best practices for improving soil health.

I see no downsides to this bill and, with your support, it will continue to demonstrate Maine's leadership regarding agricultural land stewardship.

The kids of Maine will thank you for doing what you can to ensure that our ecosystems function for us all, and into the future. This is so important. Thank you!
