Wiscasset

All of land-based agriculture is dependent upon the health of our soils. If we are not good stewards of the soil, we won't be able to grow the food we need to survive. The necessity of this legislation is self-evident: helping farmers utilize best practices when it comes to managing the soil helps us all. Please do the right thing for the health of the land and the people by supporting LD 437- An Act To Establish the Maine Healthy Soils Program.
