SOUTHWEST HBR

I became appalled by our Gov. backing of the Corridor when she did an op-ed for our Maine newspapers which prompted my continued research on the issue.

Now I see that even though the law and our Constitution are very clear, two different administrations entered into illicit leases with CMP for construction of the unpopular NECEC Corridor.

Does anyone remember Gov. Mills endorsement of Biden for President stating that: "Joe Biden will not sell us out to any other country at any time, for any price, for any reason."

The very person who wrote this, our Governor, said Joe Biden will not sell us out to another country. However our Gov. already has sold us out to the province of Quebec by endorsing the Corridor and in June vetoed two bills aimed at creating obstacles for the corridor, because she is in favor of that Foreign Influence in Maine.

LD 471 simply reaffirms that the Bureau of Public Lands must secure a  $\frac{2}{3}$  vote for the approval of their lease with CMP

Please do what is right for Maine people, not Quebec.
