

Savannah Rice  
Phippsburg

The tax payers of Maine deserve better. Our public lands should not be leased, sold or altered without the consent of the people. Backdoor deals are not what Maine is about. We are known for our trees; what will happen when they are all gone? Highway-like transmission lines will bring more than spray that keeps the brush down, but ATV trails, more people, more development and construction. Untouched parts of Maine will forever be changed. For what? I believe in cleaner, more sustainable energy solutions but this transmission line is not it. We must be diligent now in protecting the rights of Mainers for the future. We deserve a say in how our public lands are used and altered. The choice you make today matters. Thank you for your consideration.
