Stockton Springs

I strongly support the passage of LD 1075. It is time for the people of Maine to decide how the state resources will be managed. Deep Pockets from foreign business can not abuse our natural resources to line their pockets. The north woods is the last dark spot east of the Mississippi where skies can be fully observed and migrations can easily use celestial navigation. The impact on tourism economy could be devastating to small communities. There need to be very clear rules for assessing the impacts on our forestland. In the current issue of NECEC, Canadian business is spending a fortune to influence the vote. I daresay that such interference would not be tolerated if a USA company were doing this in Canada.
