Please do not pass proposed LD 1407. Maine municipalities must continue to have the final say regarding forestry practices within their town borders. This is a decision that should not be relegated to private companies. It is crucial that a town's citizens maintain their right to determine what occurs within their locality and what is deemed to be a nuisance. "Accepted Practices" is a nefarious term that would allow private companies to jeopardize the health and quality of life for a municipality's residents. This is unacceptable.
