

Hugh Harwell  
Albion

This bill is an affront to the sovereignty of all Maine towns and cities and to the health and well being of all our citizens. What the greedy corporations do as "accepted forestry practices" are intended only to extract all the wealth they possibly can from our ecosystems and working families, transferring the values they provide to their personal, out-of-state bank accounts. We need those resources here and we must trust our citizens, through their local officials, to make the right decisions for managing their local ecosystems. PLEASE KEEP IT LOCAL, and pass LD 125 instead. Thank you.
