

Don Loprieno
Bristol

Based on the summary of LD 1407, I am writing in opposition to this bill. The summary seems to limit responsibilities for actions caused by forestry operation if they violate or ignore restrictions imposed by towns or government, ceding all authority in such matters to the ACF state agency. I think that very much favors loggers and not ordinary citizens and undermines local sensibilities and local control. Nuisances are often defined by those who are affected by them. Their views and opinions should always be considered.
