

Safiyanu Yushau  
Saminaka

I'm Safiyanu Yushau Gidan Dutse Lere LGA kaduna State Nigeria, I'm here to present my testimony on Agricultural and forestry conservation.

Firstly Agriculture is a major sources of incomes in the world after the devaluation of crude oil and gas in market, the conservation in Agriculture is necessary because of the reasons that follows:

1. Without agriculture their is no foods.
2. Without agriculture their is no shelter
3. Without agriculture their is no clothing
4. Without agriculture their is no animals that humans depend on.
5. Without agriculture their is no markets

With these five reasons I mentioned you will be able to understand that agriculture need conservation and agriculture is the ruling source of economic development.

To conserve agriculture we need professionals in Agricultural department of our universities and colleges.

Agriculture is everything.

Safiyanu Yushau
