

BPL Public Lands Harvest Data				
Total Harvest, Comparison to Sustainable Harvest Level (SHL)				
2001 to 2021				
Calendar/ Fiscal Year	Regulated Acres	Sustainable Harvest Level (cords)	Harvest from Inventory (cords)	Harvest as % of SHL
2001	349,414	105,000	48,506	46%
2002	349,414	112,000	49,577	44%
2003	349,414	112,000	66,902	60%
2004	349,414	112,000	91,369	82%
2005	349,414	112,000	80,776	72%
2006	352,129	111,881	67,237	60%
2007	395,695	114,860	71,087	62%
2008	395,695	114,860	121,945	106%
2009	395,695	114,860	88,885	77%
2010	395,695	114,860	109,444	95%
2011	395,695	114,860	130,563	114%
2012	395,695	114,860	101,669	89%
2013	396,447	141,500	139,798	99%
2014	396,447	141,500	164,011	116%
2015	396,447	141,500	139,896	99%
2016	418,572	149,000	120,629	81%
2017	418,572	159,000	124,612	78%
2018	418,572	159,000	133,970	84%
2019	418,572	159,000	125,450	79%
2020	418,572	159,000	101,700	64%
2021	418,572	159,000	84,917	53%
Annual average	389,245	128,525	100,666	79%

Note: The maximum harvest level established by the legislature in 2015 is 160,000 cords over a rolling 3-year average.
