LD 2013

Please support LD 2013! I've been a certified organic farmer in Maine for over 30 years and PFAS contamination of Maine farmland is a devastating blow to the farming community in Maine, to rural residents of Maine, to buyers of local food, and to wildlife. I want the State of Maine to do everything it possibly can to uplift the farmers who have and will take the hit from a practice that the State of Maine permitted. The harm is vast. The response needs to be commensurate.

Thank you.
