LD 2013

Please support LD 2013. Finding out that you have high levels of PFAS in your water, in your dirt, in your plants, in your animals, in your body - is devastating. Please help those who find out they have PFAS with financial support to help them through this extremely hard time. Money probably can't help with the long-term health effects, but it will help these businesses make it through to the other side.

To be clear, I'm for all of the Purposes outlined in the bill. I hope this bill can address and fund them all.
