

I support passage of LD 2013, An Act Relating to Perfluoroalkyl and Polyfluoroalkyl Substances Contamination in the State. Mainers rely on family farms to provide food for our communities. The contamination of agricultural land with “forever chemicals” occurred through no fault of the present landowners and they should not be required to shoulder the burdens that they are faced with. The State of Maine owes these hardworking citizens the assurance that they will have help with the health and financial burdens that have been forced on them. It’s simply the right thing to do, and the future of farming in Maine depends on it. Please pass this legislation, for everyone’s sake.
