Re: Support for LD 2013 - An Act Relating to Perfluoroalkyl and Polyfluoroalkyl
Substances Contamination in the State

My name is Skye Cahoon and I live in Edgecomb. I am testifying in support of LD 2013. Farmers all across Maine are suffering financially and emotionally after receiving news that their lands are poisoned with PFAS. The state of Maine has provided businesses with licenses to spread the sludge, but no safety net for the farmers who are suffering the consequences of it. Farmers are the backbone of the Maine economy, not to mention our food system here in the state and nationwide. Passing this bill would not only support farmers in their personal lives and businesses as they work through this stressful and demoralizing time, but would also provide better infrastructure for their businesses in the future.

Please pass LDA 2013 to show that Maine cares about and supports its working people and working lands.
