LD 2013

Honorable members of the Agriculture, Conservation and Forestry Committee:

I write to express my unequivocal support for LD 2013, an Act that if passed would provide some relief to the horror of PFAS. I am a former board member and long-time volunteer at Good Tern co-operative market in Rockland, an organization devoted to small farms and healthy local food.

The state-sanctioned practice of spreading sludge on farm fields is to blame for this frightening development, and we owe Maine farmers our best efforts to mitigate the problem.
