Waldo
LD 2013

In Maine we have put our farms and farmers in harm's way, to say the least. Through no fault of their own PFAS has poisoned their land and threatens their farms, their homes, and their livelihoods.

Please pass LD 2013 so we as a state can act to get rid of PFAS from manufacturing and entering the waste stream. And so we can help our farmers and farms survive.

Healthy local food is the answer to food insecurity.

No farmers=No food.
