

Lorelei Cimeno  
Stockton Springs  
LD 2013

I would like to urge support for this bill. I am a farmer in Stockton Springs. My heart breaks for other farmers that have had their livelihoods, health and wellbeing damaged by PFAS contamination on their farms. They need to have safety nets in place to help them through this difficult time. The state of Maine encouraged spreading of sludge on farmland. It's time for the state to deal with the consequences of that.
