LD 2013

Members of the Committee:

Having grown up in Madawaska and spent some formative years on an out of state farm, I urge you to be more attentive to the integrity of good land and clean water. I currently live and serve in the communities of Jay and Farmington and surrounding towns. The regrettable effects of the spreading and dumping of sludge with "forever chemicals" unto land and into waterways is a failed policy. The common good of the farmers, neighbors and indeed all Mainers requires a remedy.
