

I live over in Farmington. Would like to testify in support of LD 1302. I used to work at Misty Brook and at Ironwood Farm in Albion. Both of whom recently learned they have PFAS contamination in their water and land and are trying to figure out what to do.

When I worked at Ironwood Nel and Justin were just starting out and I have never seen two people work harder or be more passionate. They had a dream and vision and a desire to help make positive change to our food system here in Maine and I watched them both put in unbelievably long days to bring an old farmhouse and barn back to life and completely transform long neglected lands into a thriving local business that employs local people and feeds the community. To see them and their three-year-old son Harlan dealing with the fallout of state sanctioned sludge dumping is absolutely heartbreaking. These are our farmers, they feed us, they nourish us, they put it all on the line for us to have food and milk on the table and we can't abandon them to this disaster that they played no part in creating. They need our full support and they deserve our full support and I urge you to please vote in favor of LD 1302. Thank you so much for the opportunity to speak and for all you do in service to Maine.

Thank you,
Sarah Loftus
