Kittery Point
LD 2013

Dear Committee Members:

I am urging you to support LD 2013. The PFAS contamination to Maine wells and farmlands is a disaster to the farmers of the state and is a danger to all the citizens of Maine who have supported these farmers over the years. The state needs to accept the responsibility for the damage PFAS's have caused in Maine. How can anyone feel secure in eating the foods grown in Maine when the danger of PFAS's are real? This cannot be something that is just studied but never acted upon. The farmers are victims here and need to be compensated for the loss of their livelihoods. The long term affects of this to the economy of Maine and the health of its citizens is a Love Canal or Flint Michigan in the making. Act now and save our future!
