

Lucy Sullivan  
Smithfield  
LD 2013

Hi My name is Lucy Sullivan, I live in Smithfield Maine. I am deeply disturbed by PFAS and the widespread damage it has cost the health and integrity of the land here in Maine and the long arch of the damage it has done and will continue to the bodies of those who work in the soil, drink the water and consume food from these affected areas. The state must help the farms who have been affected, as the state issued these licenses for the sludge to be spread. It is the State's responsibility to support farms adversely affected by that decision. Please do what is right and support LD 2013.
