The dumping of "Forever Chemicals" on our farmland is a travesty.  
We all eat and drink what farmers produce. Fund the removal and restoration of farmlands effected. Corporations need to be held accountable and farmers supported. It is a basic human right not to be poisoned by food. Farmers are our lifeline to health. This issue must be dealt with responsibly or we will all face the dire consequences.  
Clean up the mess. Or. Get voted out.  
Simple equation: Do your jobs to protect our food sources or find another Jon.
