I am in support of establishing an outdoor school for all Maine students program. I am a school outing club advisor and I believe that it is so important to give all students opportunities to realize what Maine has to offer in the out of doors. Making it part of school requirements enhances students' opportunities and introduces them to lifestyle choices, career opportunities, and mental health support. Many people have become so dependent on their screens and devices and I see this as a way to remember how special Maine's environment is. This is the way to raise future leaders who will make informed decisions to protect this great resource.
