

Sharon Adamsky
Baring Plantation
LD 579

I support LD 579 because I like to buy as much of my food as possible from small locally owned farms. In this way I know I am getting fresh, nutrient-dense, and often organic food. As an added bonus, in shopping this way I feel I do not have to concern myself about the risk of contamination that seems to happen so often in corporate farming and industrial food processing. Because I prefer to buy fresh local foods I would like to see the state give its full support to small farming and locally owned farming by protecting our existing farmland.
