LD 2091

To the Committee on Agriculture, Conservation and Forestry:

I write in support of the bill LD2091. As a Maine resident, I keep looking for ways to eliminate my family's use of plastic. I am careful what I purchase and attempt to keep our disposal of plastics to the local land fill at a minimum. Post covid, I am finding this more and more difficult to do as packaging has radically increased for perishables at the market. Our landfills are filling up faster than ever, creating shortfalls in town budgets and a move away from recycling. We see that recycling efforts at present are ineffective. This bill helps us prevent the purchase of containers in the first place and is one thing I can do to help cut back.
