LD 2091

I am writing to demonstrate my support for LD 2091. I have been working to reduce my plastic waste for a few years now, and buying bulk and using refillable containers has been the most impactful way my buying habits have changed. Being able to buy from small businesses that sell in bulk and offer refillable containers and refills has made these changes possible for me. Not only do I save money with these changes, but I have less clutter and produce less waste. I hope that even more changes can be made in the near future so more people can easily reduce their waste and impact.
