LD 2091

Reducing solid waste would benefit each municipality as well as the environment. I have read that Juniper Ridge is filling faster than anticipated. (Stop them from accepting out-of-state bulky waste!) There is no such place as "away"; when we toss something, it stays in the landfills. Since most containers do not compost well, removing them from the waste stream is sensible.  
LD 2091 makes so much sense. I encourage a YES vote.
