Please understand that this bill will make the medicine that autistic children like mine illegal. There is absolutely no need to further regulate this safe , effective form of medicine. I don't believe for a moment that this is for anyone's safety, therefore it is unnecessary. Dr Sulak is a wealth of knowledge and please take any testimony he gives with the highest regard . He has helped so many children that the medical community has given up on. Unless you have a child that pulls their teeth out from the pain and suffering from this autism epidemic then maybe you can't understand. Dr Sulak is one of the very few that can give our children some peace and happiness. The medicine he makes is priceless. This bill will cause immense suffering if it passes into law .
