York
LD 2212

We have for many years been enjoying the local produce from Maine farmers. Lately we have seen that even beautiful flowers are being grown in heated green houses-tulips!! More and more new products are being grown and need markets for them to prosper. This bill LD 2212 will help Maine's farms, as well as the wood products industry to market their products. More farms more open space, more fresh air, more opportunities for young families to come to Maine. Please pass this bill; it will be \$\$\$\$\$\$\$\$\$\$ spent that will improve Maine's economy and Mainer's way of life.
