I am writing in support of this bill. I do not think that the Department of Corrections and Counties should be making money off Maine families and people who are incarcerated. We already pay taxes to fund prisons so there's no need to charge more. There are also many families with children who cannot contact their parents and interfering with children's contact causes long-term harm to children. The bottom line is that price gouging phone calls, commissary, and video services hurts Maine families. For these reasons I ask that you please vote yes on LD 1175. Thank you.
