

Elizabeth Mikotowicz
Bangor

As a woman who's been to federal prison and survived addiction because I was put in the hospital by my x then pumped full of opiates while being told I was on to small of a dose to get addicted, I feel I have valid input!! When Lepage was in office I tried for years to get help and couldn't afford it. By the time I got out of prison Mills had changed things, I was able to get trauma counseling and drug therapy. I've been out 3 years still clean and am a member of the Bangor arts society and just launched a clothing line with my art! I'd probably be dead if Mills hadn't given people like me access to healthcare. Half of my generation is dead because big Pharma made trillions off our suffering and addiction and politicians like Susan Collins got a big pay day while the rest of us overdosed and went to prison!! We trusted you!! Now you need to help save the few of us still left that we're lied to about the meds they were taking then put in prison for going insane as a result!! Enough with the modern day slave trade and your legal drug dealers that never face consequence!!
