

Pam Blake
Freeport

We seem to be becoming a more and more violent society, with gun violence threatening our sense of security ever more greatly. Stand your ground laws of any sort will only exacerbate this existential problem. Please, please, with all my heart, I ask that you not allow this bill to proceed. It will only make us all less safe and lead to the possibility of vigilante justice that has no place in a society that promotes life, liberty and the pursuit of happiness under a system of equal laws for all citizens.
