I am writing to urge you to support this bill. It is dangerous to have to first seek a way to retreat in situations where it would be inadvisable to do so. We have an inherent right and a duty to defend ourselves, our families, and even others no matter where we are. Certainly avoiding potentially dangerous situations is advisable, but sometimes that is just not possible and it should not be first in our minds that if we don't seek to retreat we could be prosecuted. Please support this legislation.
