

Ryan Adams  
Fayette

I would like to state my opposition to LD976. A bump stock does not make any firearm into a machine gun by any definition. I personally have not owned one nor do I wish to. These firearm accessories do nothing but make it harder to aim and waste expensive ammunition. The ATF/AFT already told millions of Americans they had to destroy the property they paid for or risk becoming criminals. I believe there should be more important matters for our representatives to be discussing. Thank You
