

Ian Brown
Auburn

I was born and raised here in Maine, i take pride in our state and the current respect for our constitutional second amendment rights. I see no logical reason for this bill or any of the other politically fueled restrictions on our current second amendment rights and freedom here in the State of Maine. The policies and laws in place are already more than sufficient and our states violent crime rates involving firearms should be more than enough proof of that. So i object to this legislation and implore you to please do the same!
