

Brett Bulmer
Gardiner

Civil rights are not granted by our State and Federal Constitutions. These rights are simply RECOGNIZED by those documents, as they are natural rights, existing long before those documents were drafted.

Our civil rights—including our 2nd Amendment rights—should not even be up for a vote. Additionally, no politician should have the authority to suspend or restrict those rights, even temporarily.

During a State of Emergency, the civil rights of Maine citizens should be off-limits. In fact, in times like these, rights should be afforded extra protection, not less.
