

Simon Cavilla
Skowhegan

I strongly oppose this proposed bill.

Any firearm that is legally purchased can be turned into an untraceable firearm using simple tools to remove. Currently, it is not illegal to manufacture a firearm for personal ownership whether it is one or multiple for personal ownership.

Under Federal law, personally manufactured firearms can not be sold to other individuals. If it is to be sold or transferred to another individual then a serial number needs to be engraved and an FFL must transfer the ownership via background check.

I urge you to vote "Ought Not to Pass"

Thank you for your time
