Resident

Thank you for listening to my testimony in opposition to LD 1454 An Act To Prohibit Untraceable And Undetectable Firearms.

Seeing as I seemed to be the only person testifying who had first hand knowledge of 3d printed firearms, and likely the only person there who owns a 3d printer, I was very disappointed that I received very few questions.

If you would like some insight into the craft-built gun community, or the technology related to them, I would very much like to answer any questions you might have. These decisions must be made with cold hard facts.
