I Strong Oppose LD 1454

This is a law that is non-enforceable, but would make law abiding citizens criminals. I don't think that is what this Committee wants.

The United States Undetectable Firearms Act of 1988

General effect of this legislation is a ban on the manufacture, possession and transfer of firearms with less than 3.7 oz (105 g) of metal content. The bill also requires handguns to be in the traditional shape of a handgun. So why does Maine need it's own law?

Traceable guns is the first step to gun registration which leads us down a dark path of government control that goes against the Constitution of both Maine and the United States. Guns do not need to be traceable!

I STRONG Request that the Committee vote OUT NOT TO PASS on LD 1454
