

Gregory Hunnewell
Belgrade Lakes

I support LD 1052 as it clarifies that essential rights and that essential business need to stay in place during a state of emergency, what happened during the start of the State of Emergency we are currently under was a travesty that should not be repeated. Those of us who do a lot of practicing with firearms to stay proficient were limited as to where we could purchase ammunition and components to reload our own ammo. And we were also limited as to where we could practice with our firearms so I whole heartedly support this bill as written.
