

John Lagnese
Biddeford

This will restrict the rights of individuals to make their own firearms. This traditionally has been a right that many Mainers have used. There is no reason to consider these as "untraceable". Since gun registration is not only not required and would go against both the Maine and US Constitutions this is an entirely both unneeded and illegal action. This can only be a precursor to gun registration. Once again an action that would be highly unconstitutional. I strongly urge that this be turned down.
