

Jennifer Knowles  
Casco

I have lived in Casco near Thomas Pond for over 20 years. There were always a few fireworks set off around July 4th and sometimes New Years. Once they were legalized the frequency and quantity increased dramatically. They now keep me up almost every summer weekend as well as many work nights. They boom and echo around the pond. Many of my neighbors are not fans of this either. It scares pets and children as well. The more powerful fireworks now available shake our homes and windows. Our homes are our sanctuary we should not feel like we are under attack. Last summer I tried to walk my dog a couple of Saturday evenings and it sounded like we were in a war zone. If a full ban is not possible, if there was a way to limit the decimal level of legal fireworks that would be very helpful. Thank you
