

Anmarie Reed
Solstice Psychotherapy, LLC

As a mental health therapist in the field for over ten years, I understand the importance of law enforcement obtaining proper training in the areas of racial issues and substance use. Many of the clients I work with have experienced trauma in the hands of officers whom did not have proper training to understand the impact of their actions. Additionally, many folks do not feel safe accessing the police as a resource when needed out of concern they will be further harmed. Please consider passing this bill.
